

# OAC COMMUNICATOR

## On The Front Page

### A Message From Our Joint Leadership,

Since launching our all new Edge and Lincoln Nautilus, the entire OAC team has been dedicated and working hard to ensure that our products are delivered to our customers. Our production schedule has been running at full throttle with five consecutive production weekends. We appreciate this is a bittersweet feeling for all of us as we are heading into the holiday season! It's great to know that our products are in such high demand.

We know this is a tough time as we are at work and away from our families. Both the Plant and Unifor Leadership appreciate the commitment everyone has made over the last several months. That appreciation also goes well beyond the walls of the Plant. Gary Johnson, Global VP for Manufacturing made it a point to stop by the Plant on Monday to extend his sincere gratitude for the tremendous team effort at OAC to meet our customer demand!

We are in the homestretch...we are asking for everyone's support for our last two weekend shifts in 2018:

**Saturday, December 22nd: 8 hours (7 a.m. - 3:30 p.m.)**  
**Sunday, December 23rd: 10 hours (6 a.m. - 4:30 p.m.)**

Let's put our best effort into delivering this weekend and take this opportunity to show what our OAC pride is made of - with this 'Built Ford Tough' attitude we will undoubtedly be successful!

We will be successful if we pull together and support the upcoming shifts. Know that it will pay off in the most important way - building customer confidence in our products by getting those vehicles into their hands!

Ron Prahin,  
OAC Plant Manager

Joseph Closurdo,  
OAC Assistant Plant Manager

Bob Scott,  
OAC Plant Chair

Mark Luey,  
OAC Skilled Trades Chair

### Built Ford Tough

We accept challenges and overcome them with confidence, courage and optimism. We put the world on wheels, embracing disruption to evolve. We are resilient and in it for the long haul.
